Subject: Immigration and the Census

Mayor, I just heard on Channel 2 News this morning that San Jose is filing a census lawsuit against the Trump Administration over the citizenship question. Are you kidding, you are going to spend thousands of tax payer dollars to once again protect people that living in our state illegally. I am 5th generation Californian and have never witnessed what is going on with our California Politicians now. You and so many others in California are putting citizens and people that are here legally in last place. How can you sleep at night. You work for the people who pay taxes legally and pay you, not for the people who are here illegally. I am sure there are many liberal left citizens that agree with this illegal way of handling things, but there are also many conservatives that live in our state that are fed up. We are a nation of laws and people who have come and are coming here the illegal way and living amongst us, should feel threatened, just as we would be if we went into another country illegally.

Every day on the news I hear about more and more crimes committed by illegals, another issue that we do not need in our country.

I would love to see the day, when California returns to the great state is used to be, but until politicians like you that have these extremely liberal views and possibly political are gone, that won't happen. You and others are ruining our state and it's known all over the country. We have a very bad reputation now. Our schools are low on the list, our roads are awful, homelessness is extreme along with all the problems that come with that and are taxes are the highest and where is all that tax money going? Much of it is going to programs that help these people that are here illegally. Illegal felons have more rights that legals do and on and on.

My daughter who has a very good job, but her insurance plan is not that good, caught the bad flu a month ago and was very hesitant to go to urgent care for help because of out of pocket expense, but an illegal can go to any ER and get help with any health issue and pay nothing. What is wrong with that picture?

You can put me and my husband on the very fed up list with politicians such as you. We need a new governor and new majors that will uphold our laws and put citizens and people here legally first ,not last, and fix our state. It's in ruin right now and getting worse.

Sincerely, Rick and Terri Vaccaro, Woodside, CA
